City Tree List - Column Definition

Common Name	English Name
Scientific Name	<p>Latin Language (1st name=genus 2nd name=species)</p> <p>Genus- a group of closely related species. Example- Quercus alba & Quercus velutina (White Oak & Black Oak) with Quercus being the Genus name.</p> <p>Species- a group of individuals that do not successfully interbreed with individuals of other groups. Example- Quercus alba & Quercus velutina (White Oak & Black Oak) with White & Black being the individual species names.</p>
TN Native	Specifies tree species native to Tennessee (Tennessee native species will appear in green and other species will appear in blue)
Deciduous / Evergreen	Tree is either deciduous drops its leaves in the fall, or evergreen holds its leaves year-round with occasional shedding.
Mature Height	Typical mature height of adult tree under normal growing conditions.
Crown Size	Typical mature crown size of adult tree under normal growing conditions. Measured by width of drip line. "Drip Line" is a term given to the area under a tree where it sheds rain or irrigation to the ground.
Growth Rate	<p>Slow (1'-2' per year)</p> <p>Medium (2'-3' per year)</p> <p>Fast (3' + per year)</p>
Drought Tolerance	<p>How well tree can tolerate drought conditions.</p> <p>Low- not tolerant</p> <p>Moderate- some tolerance</p> <p>High- good tolerance</p>

Planting Site Area Information <i>(The column definitions below refer only to planting site areas) :</i>													
Poor - Do not plant													
Fair - Minimally Suitable Choice													
Good - Reasonably Good Choice													
Excellent - Best Choice													
Road Frontage (Street)	Street trees/pedestrian areas												
Road Frontage (Yard)	Open yard area/good root space												
Parking Lots	Enclosed planting site with restricted root space/pedestrian area												
Landscaped Areas	Large or small parks/large yards												
Drainage Areas	Natural areas/bio-retention ponds												
Utilities Right of Ways	Trees in these areas are trimmed at the discretion of utility companies on a cyclical schedule. Lower growing species are recommended.
