RE: Wastewater Release: 1320 Shepherd Drive  
NPDES Permit# TN0028827

On September 6, 2019 at 4:45pm, we received a call pertaining to a wastewater release at 1320 Sheppard Drive. Crews were dispatched to the address and arrived on-site at 6:00pm. Crews noted the infrastructure in this area is on a low-pressure system. During the initial investigation crews determined the residents on the street were not having drainage issues.

After evaluation, crews determined the release was due to a line break. It was found that the tee connecting to the main line had become dislodged, causing the release. An emergency locate was called in and service repair crews were dispatched to the location to make the needed repairs to the damaged line. We have seen several instances of this scenario with private construction installing similar services in which proper materials were not used.

The repair was complete at 9:30pm. The volume of the release was estimated to be 200 gallons. Crews covered the affected area with lime. All corrective actions were complete at 11:50pm.

If you have any questions or comments please let me know. I can be reached at (615) 794-4554 or at [jr.lee@franklintn.gov](mailto:jr.lee@franklintn.gov)

Sincerely,
